**Diane Muldrow : We Planted a Tree** before purchasing it in order to gage whether or not it would be worth my time, and all praised We Planted a Tree:

2 of 2 people found the following review helpful. A perfectly illustrated poem-storyBy PsycheWe Planted a Tree is a sweet story that is told through a gentle, lulling poem. Diane Muldrow manages to explain the benefits of trees without lecturing and in a way that is a delight to read out loud. And in a way that an active four-year-old boy can understand and enjoy.Bob Staake illustrated this lovely poem-story, so that should automatically translate as the artwork in the is book is brilliant. If you are not familiar with Mr. Staake's work, it is brilliant; both as in colorful-brilliant and in clever-brilliant, and infused with a healthy dose of humor.We Plant a Tree IS a perfect book for Earth Day, and for every day thereafter.1 of 1 people found the following review helpful. "The tree grew up, and so did we."By sarahOur 4 year old son enjoys the book, and we love it!The art of Bob Staake is captivating, as always, for the littles and grown-ups alike. He included his "Donut Chef" on one of the pages, and our son is now on the hunt for any other "Easter eggs" he's hidden along the way.The poem is beautiful and meaningful (yes, to the four year old as well). It was a great way to introduce poetry to our bookshelf.We're so happy about this gorgeous addition to our library of "tuck-in" stories.And we're probably biased because we planted a tree when each of our children were born...so they could watch the tree grow up with them.0 of 0 people found the following review helpful. Five StarsBy CustomerOne of my favorite children books

Perfect for springtime reading! In this poetic picture book with environmental themes, illustrated by award-winning artist Bob Staake, two young families in two very different parts of the world each plant a tree. As the trees flourish, so do the families . . . while trees all over the world help clean the air, enrich the soil, and give fruit and shade. With a nod to Kenyarsquo;s successful Green Belt Movement, Diane Muldrowsquo;s elegant text celebrates the life and hope that every treemdash;from Paris to Brooklyn to Tokyomdash;brings to our planet. Now in paperback, this book can be enjoyed by children in classrooms everywhere.

From School Library JournalPreSchool-Grade 4mdash;With a synergistic mesh of lyrical language and bright, expansive illustrations, this picture book enumerating the many benefits of trees is a winner. Muldrow's poetic text shapes beauty from simple observations: "The sunshine went into the buds,/And soon they burst open./Everywhere it was pink./And we were dizzy/With springtime." As the text describes the growth of the tree and the many benefits it provides (shade, clean air, fruit, sap, and holding the soil, among others), Staake's signature modernized cartoon-style illustrations circle the globe, showing families in New York, Vermont, Japan, Kenya, France, and Italy as they enjoy

what the trees have to offer. Enjoyable and informative, this beautiful presentation of a clear ecological message is perfect for sharing on Earth Day, Arbor Day, or in ecology units. — Kathleen Kelly MacMillan, Carroll County Public Library, MD Copyright copy; Reed Business Information, a division of Reed Elsevier Inc. All rights reserved. From Booklist A family in Brooklyn plants a tree in their small backyard; turn the page and a Kenyan family plants a tree on the bare African savannah. Then in Paris, Tokyo, and more places across the globe, each newly planted tree grows up, as the children in the family do. Muldrow weaves some science into the lines: "Sunshine went into the leaves / And brought food to the tree," and through the seasons, the trees grow beautiful pink blossoms, green leaves that help clean the air, and fruit, while their roots keep the soil from blowing away and provide a place for families to plant food. Illustrating the simple poetry are clean-lined digital illustrations that show the botany details and celebrate the connections between plants and people, present and long-term, across time and space, as each generation continues the conservation efforts and helps "heal the earth." Grades K-3. — Hazel Rochman About the Author DIANE MULDROW, an editorial director at Golden Books, has written dozens of children's books. She is the author of the bestselling Everything I Need to Know series, and she edited Golden Legacy: How Golden Books Won Children's Hearts, Changed Publishing Forever, and Became an American Icon Along the Way by Leonard Marcus.
